

```
import java.io.*;
import java.util.Scanner;

class person
{
    void getfirstname()
    {
        Scanner a=new Scanner(System.in);
        String x=a.next();
        System.out.println("FIRST NAME:"+x);
    }
    void getlastname()
    {
        Scanner b=new Scanner(System.in);
        String y=b.next();
        System.out.println("LAST NAME:"+y);
    }
}

public class employee extends person
{
    void getlastname()
    {
        Scanner c=new Scanner(System.in);
        String z=c.next();
        System.out.println("LAST NAME:"+z);
    }
    public static void main(String args[])
    {
        employee l=new employee();
        l.getfirstname();
        l.getlastname();
    }
}
```

}

OUTPUT:-

```
C:\Users\rohit\Documents\java>java employee  
FREIND  
FIRST NAME:FREIND  
SHIP  
LAST NAME:SHIP
```
